

Landau, 26th October 2010

Exceleram – the Highend MemoryBlacksmith in Landau / Germany announces the availability for the new Low Voltage Memory Series.

From now on you can get the first 2 Kits for LGA1156 socket. Available are the ELV001A 4GB 1333 CL7-7-7-21 (2x2048MB) Kit and the ELV002A 4GB 1600 CL9-9-9-24 (2x2048MB) Kit. The new Low Voltage Memory Kits get along with 1.35V – that’s 10% less than conventional memory.

The constitution is completed by the “Blue Culvert” Heatsinks .

“Both Kits will be available in the market soon.” said Torsten Düker, CEO. The streetprices will be reasonable prices as for the most Exceleram products.

All memories are hand-tested on mainboards to keep the quality high. Starting today, we ship the new Low Voltage Kits to our distributionspartners and E-tailors. Of course with customary 10 years warranty.

Partnumbers:

ELV001A	2x 2048MB	1333MHz	CL7-7-7-21	1,35V
ELV002A	2x 2048MB	1600MHz	CL9-9-9-24	1,35V
