

Press Release

Excelemem launches new memory series for Intel Sandy Bridge

Landau, 31th January. Excelemem – the Highend MemoryBlacksmith in Landau / Germany announces the availability of the New Rippler Memory series especially for Intels new platform „Sandy Bridge“

On the beginning there are 5 new memory kits with capacities of 4GB and 8GB. The clock rates are 1333MHz and 1600MHz.

These Rippler Kits are selected and developed especially for Intel Sandy Bridge platform. Therefore endusers can feel confident to get a perfect working memory kit for their new mainboard.

“True to the Excelemem motto, all memory kits are tested by hand on different mainboards in Germany.

Thus our constant high quality is guaranteed for highest stability and reliability.

Customer satisfaction is our first priority.” says Martim Reis Silva, sales director Excelemem.

The new series is available from now on.
